ECOTRAILS AND
COMPANY

Our mission is to enrich the soil and nourish plants by providing high-quality, sustainable organic manure. We are dedicated to fostering healthy soil, supporting organic farming, and promoting environmental stewardship. Through innovation and responsible sourcing, we strive to deliver natural solutions that enhance plant vitality, increase agricultural productivity, and contribute to a greener planet.

BIOCHAR

Biochar – a natural soil amendment made from agro-residues that **boosts soil carbon**, retains water and nutrients, and improves soil fertility for healthier crops.

- 100% Natural and Chemical Free
- Improves Soil Quality and Fertility
- Enhance Water Holding Capacity 15-30%
- Improve Nutrient use efficiency 10-25%
- Fertilizer use reduction potential upto 30%
- Supports Good Microbial Activity in Soil
- Yield improvement upto 20%
- Restores Lost Carbon in Soil
- Beneficial for sustainable & organic farming

Low-carbon soils waste a lot of fertilizer.
Biochar helps hold nutrients in the soil so crops
can absorb them better.

Produced from
hardwood
